ProfiGymMat

110 Kg/m³

ProfiGymMat®

180 x 60 cm, 110 Kg/m³
Material: NBR

Like all of our ProfiGymMats, this gym mat consists of the soft and stable NBR foam. With a density of 110 Kg/m³, this ProfiGymMat is the softer version and is used particularly in the private sector. The food-safe material is characterized by its mechanical resistance and is therefore extremely durable. The mat is BPA-free and therefore suitable for pregnancy exercises and fitness with children.

BURST RESISTANT BALL

Bureba® Ball Professional

Material: PVC 6P free

The Bureba® Ball Professional can be used both as a training device and as a sitting ball. The exercise ball is particularly suitable for strengthening the upper body and core muscles and also improves posture and balance. With different exercises in standing, sitting, lying down or on your back, the different muscle groups can be addressed and the intensification of the training adjusted.

The exercise ball meets extremely high safety requirements. The carrying capacity is 300 kg and thanks to the burst system, the ball cannot burst even if it is damaged with sharp objects.

The Bureba® Professional is available in three sizes and four colours as well as transparent and can be inflated and regulated individually with each pump.

Trendy Ponte

Size: 31 x 29 x 9,5 cm
Material: EVA

closed cell structure

light weight

durable

recyclable

Trendy Ponte offers you through its two sides a very extensive spectrum of possible uses. With the help of the pointed elevations and the depression in the middle, the board can be used particularly well for fascia training.

Above all, the supine position, in which pressure is created by lowering the pelvis, is particularly effective in mobilizing, stretching and strengthening the lower back.

Not only can the trigger points be determined individually, but a massage effect can also be created.

Incl. sales packaging.

Article	9117
---------	------

The effects can also be felt during fascia training while standing, as the foot is mobilized and the balance is strengthened. In addition, the calf is stretched, the foot lift and balance are trained. The Trendy Ponte is not only suitable for fascia training, but also for the fitness area. It can be used as a rocker crosswise or lengthways to bring yourself off balance through conscious movements. A particular success is achieved in the areas of stabilization, balance and stretching.

MASSAGE ROLLS

MAROLA®

PREGO®

FASCIA BALLS

FASCIA ROLLS

[▶ MORE DETAILS](#)  [YouTube](#)

Trendy Marola

Ø 13 cm / 30 cm
Material: EVA, ABS (tube and cap)

With the help of the stable and robust surface structure of the fascia massage roll, an excellent trigger point therapy can be brought about and a complete muscle massage can be achieved. This is particularly important because the everyday stress on our body can lead to one-sided stress on the muscle and fascia tissue.

As a result, the cells store more fibers, which causes the tissue to become denser and the circulation to be restricted, so that shortened and densified muscle areas are formed, so-called trigger points.

Incl. sales packaging.

Article 9102

[▶ MORE DETAILS](#)

Trendy Connector

With the Trendy connector you can connect two Trendy Marola or Prego fascia rolls to each other and thus get a 60 cm long fascia roll for an even more diverse choice between exercises while standing, lying or sitting.

To do this, you have to unscrew a cover from the roll and screw in the connector between the two rolls.

Incl. sales packaging.

Article 9122

Trendy Prego [▶ MORE DETAILS](#)

Ø 13 cm / 30 cm
Material: EVA, ABS (tube and cap)

The pyramid-shaped massage points of the Trendy Prego are especially suitable for deeper lying and more firmly seated tension in the muscle areas of the lower extremities, the back and to stabilize the trunk. The gently curved center relieves the spine and at the same time provides an intensive massage of all adjacent muscle areas. Accessories such as Trendy Bola can be stored inside the roll and closed with the screw cap.

Article 9104

Massage Roll Pontia

Ø 7 cm / 39 cm
Material: EVA, PP (cap), POM (tube), TPR (grip)

[▶ MORE DETAILS](#)

When using the Trendy Pontia you have an active and quick regeneration of the tissue. The soft tissue components of our connective tissue are known as fascia, which span our body like a net. The fascia are also involved in important movements and metabolic processes.

Due to the pyramid-shaped elevations, lower-lying fascia can also be reached and thus resolved as a result of regular use, which in turn promotes and increases blood circulation. Thanks to the handles, the roller is stable and secure in your hands and thus also makes it easier to reach pla-

ces such as the neck, legs, arms and shoulders. The roller covers a wide range of applications and, thanks to their comfortable size, fits in any sports bag.

Incl. sales packaging.

Article 9106

[▶ MORE DETAILS](#)

Massage Roll Ondas

Ø 7 cm / 39 cm
Material: EVA, PP (cap), POM (tube), TPR (grip)

The wave-shaped massage roller Ondas does not work as deeply into the muscles as the Pontia massage roller and acts a little more gently.

Incl. sales packaging.

Article 9107

Trendy Lua

Fascia Ball Bola

Sizes: Ø 6cm / Ø 8 cm / Ø 10cm
 Weight: 7 g / 13 g / 31 g
 Material: EPP

The fascia ball series was mainly developed for the self-treatment of trigger points and tension. With the help of the compact size even small, deeper and therefore difficult to reach tensions in fascia and muscles can be achieved. This means that trigger point therapy can be used, which is especially important today.

Our body is exposed to a lot of stress every day, which is mainly due to an often unfavorable work posture, too

little exercise or too much stress. As a result unilateral stress can occur in muscle and fascia tissue causing the cells to begin storing more fibers. The consequences should not be underestimated as the tissues become denser and harder which reduces blood flow. This allows shortened and compressed muscle areas to form within a muscle, the so-called trigger points. These can spread to other parts of the body and cause severe pain there.

With the help of constant pressure and regular use of the fascia balls at these points, the tissue can be relaxed and the trigger points released. Choose the right size for your fascia ball and determine the intensity of your massage yourself!

Fascia Ball Bola Colour

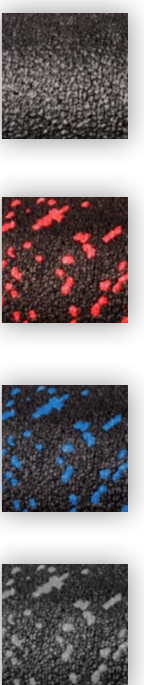

Sizes: Ø 6cm / Ø 8 cm / Ø 10cm
 Material: EPP

Now the fascia ball is also available in gray, blue and red in all three sizes. The doming can also be customized on request.

Yogamat Cortica

180 x 60 x 0,4 cm
Material: Cork, Natural Rubber

The new yoga mat Cortica combines the pleasant properties of the natural material cork with the great anti-slip properties of PU. PU also gives the mat a particularly high level of slip resistance, and its high weight ensures that the mat lies flat. Cork is a very robust and durable material with antibacterial and antiallergic properties and, like na-

tural rubber, is made from renewable raw materials, is recyclable and therefore particularly sustainable. The markings are not only a real eye-catcher, they also help you to carry out your yoga exercises correctly. The mat is therefore ideal for professional yoga, but also for your fitness training at home.

Ceiling mount

(not included)

Article 8107

Especially in our fast-paced times, it is important to find peace inside - meditation can create a balance in hectic everyday life to relax and recharge your batteries. A stable sitting posture is very important when meditating in order to be able to sit relaxed in the various meditation postures for a long time and to avoid postural damage. With a meditation seat cushion, overstressing the knees can be avoided, the weight on the back and pelvis is better distributed and blood circulation is promoted.

Silensia also facilitates a back-friendly and upright posture, which allows the chest to open and you can breathe freely.

The pillow cover is made of a pleasantly soft velvet fabric, which can be removed via a zipper on the underside of the pillow and washable at 30 °.

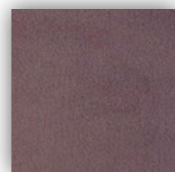

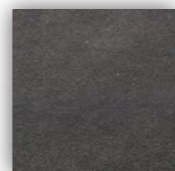

The Silensia cushion is filled with heat-storing and breathable buckwheat hulls, which adapt well to your seat and thus offer additional support and stability. Create your haven of calm now and breathe deeply in and out with Silensia!

▶ MORE DETAILS

**AcuReWell®
Acupressure pillow Picata**

30 x 40 cm
Material: 100% Cotton, ABS (spikes)
Filling: Buckwheat hulls

washable

durable

recyclable

Our new acupressure pillow Picata from the acupressure product range AcuReWell® effectively relieves your head, shoulder and neck pain, which often results from stress, little movement and poor posture. The treatment resembles a pleasant head massage and can be used anywhere and at any time with the handy pillow size of 40x30cm.

The principle of action of acupressure is based on the millennia-old tradition of Chinese medicine and ensures that the life energy flows through the body without interference via meridians and thus creates physical and psychological well-being.

The acupressure products stimulate the blood circulation through their massage pressure points and also stimulate the production of endorphins, which has a positive effect on the sensation of pain. In addition to pain relief, positive effects such as stress relief or the relief of sleep disorders are also achieved.

The products consist of 100% natural cotton and are extremely pleasant and skin-friendly due to the temperature and moisture regulating properties of the cotton.

Incl. sales packaging.

ATS® Premium Polyurethan Disk

Inside diameter: Ø 50 mm
Material: Cast iron, PU

Our new Aperto Trendy Sport® polyurethane disks impress with their unique design - with the black matt surface, which is interrupted by grey sporty lines, they not only set new optical standards in weight training and fit on any barbell with a 50 mm diameter.

Thanks to the PU coating, the disks are extremely abrasion and scratch resistant and therefore very durable. The four integrated anti-slip handles ensure ergonomic handling. The ATS® disks are available in seven different weight levels from 1,25 Kg to 25 Kg.

ATS® Premium Bumper Plates

Inside diameter: Ø 50 mm
 Outside diameter: Ø 450 mm
 Material: 100% Rubber

Our new Aperto Trendy Sport® Premium Bumper Plates in exclusive Trendy Sport Design offer you an even larger selection of high-quality equipment for your strength training! The weight plates consist of 100% recycled rubber granulate and are therefore not only sustainable, but also extremely durable and robust. The material makes the impact extremely quiet and gentle on the floor. Nevertheless, ATS® Rubber Disks are flexible and at the same time extremely abrasion and scratch resistant.

- 
antislip
- 
extremely good absorption
- 
very good acoustic insulation
- 
durable
- 
sustainable production

All sizes have the same diameter of 45 cm, which means that the weight is evenly distributed on the floor when you put it down, making it ideal for dynamic training. The discs fit on any dumbbell bar

with a 50 mm diameter, such as our ATS® bars, but can also be incorporated into your training without a bar. The ATS® weight plates are available in five different weight levels from 5 Kg to 25 Kg.

Premium Esfera Ball

Size: Ø 19/23/29 cm
Material: Rubber

With the help of the Esfera Medicine Ball, you have a wide range of possible uses. The Esfera Medicine Ball is equipped with a needle valve, which ensures that you can regulate the air yourself. This enables an individual adjustment of the jumping power.

Due to its pimpled surface structure, it is particularly easy to grip, very hard-wearing and extremely durable. It is easy to wash off, which ensures a high level of hygiene. The different colours indicate different weight levels.

Trendy Esfera Bag

Length 55 cm / Ø 24 cm
Material: PVC
Filling: Sand

The Esfera weight bag appeals to many muscle groups and can therefore be used in a variety of ways. The many handles and loops enable numerous training units. With the help of the self-selectable weight levels, an intensive training can be individually adapted to your own physical performance. The special thing about the Trendy Esfera Bags is that the sandbags they contain are not

with 5 handles

sewn, but glued, which makes them burst-proof. The sandbags can be easily exchanged via a zip opening. The different colours indicate different weight levels.

 Material: 100% recycled rubber

1000 kg/m³

[▶ MORE DETAILS](#)

With our Rubber Flooring Segura system, we offer you high-quality floor mats in five different thicknesses for your fitness and weight areas and thus maximum safety during training, effective noise reduction and optimal protection of your floor.

With a density of 1000 kg/m³, our mats are extremely hard-wearing and are particularly suitable for equipping professional fitness and weight training areas. Our long-lasting system in classic black

consists of 100% recyclable and environmentally friendly rubber granulate. It is therefore pleasantly warm, comfortable and gives a joint-friendly running feeling.

Thanks to the tooth system, the mats can easily be laid loosely and do not slip due to their high weight and surface adhesion.

The 100 x 100 cm mats can be individually adapted to your room conditions and with their high abrasion resistance they are the perfect choice for use in fitness stu-

dios, playgrounds, kindergartens and much more. Tripping edges are avoided by the bevelled edge and corner strips and therefore offer additional safety and comfort. Create the right foundation for your fitness area NOW, because the premium material is tailored to the needs of your customers

Rubber Flooring Segura Weight Lifting

50 x 50 cm | 0,5 m²
Density 1000 kg/m³

The particularly strong 30 mm Segura Weight Lifting rubber floor was specially designed for training areas in the heavyweight area. The floor offers a high level of safety thanks to extremely good sound and shock absorption.

Article	21030A	21030GR
Colour	Anthracite	Grey

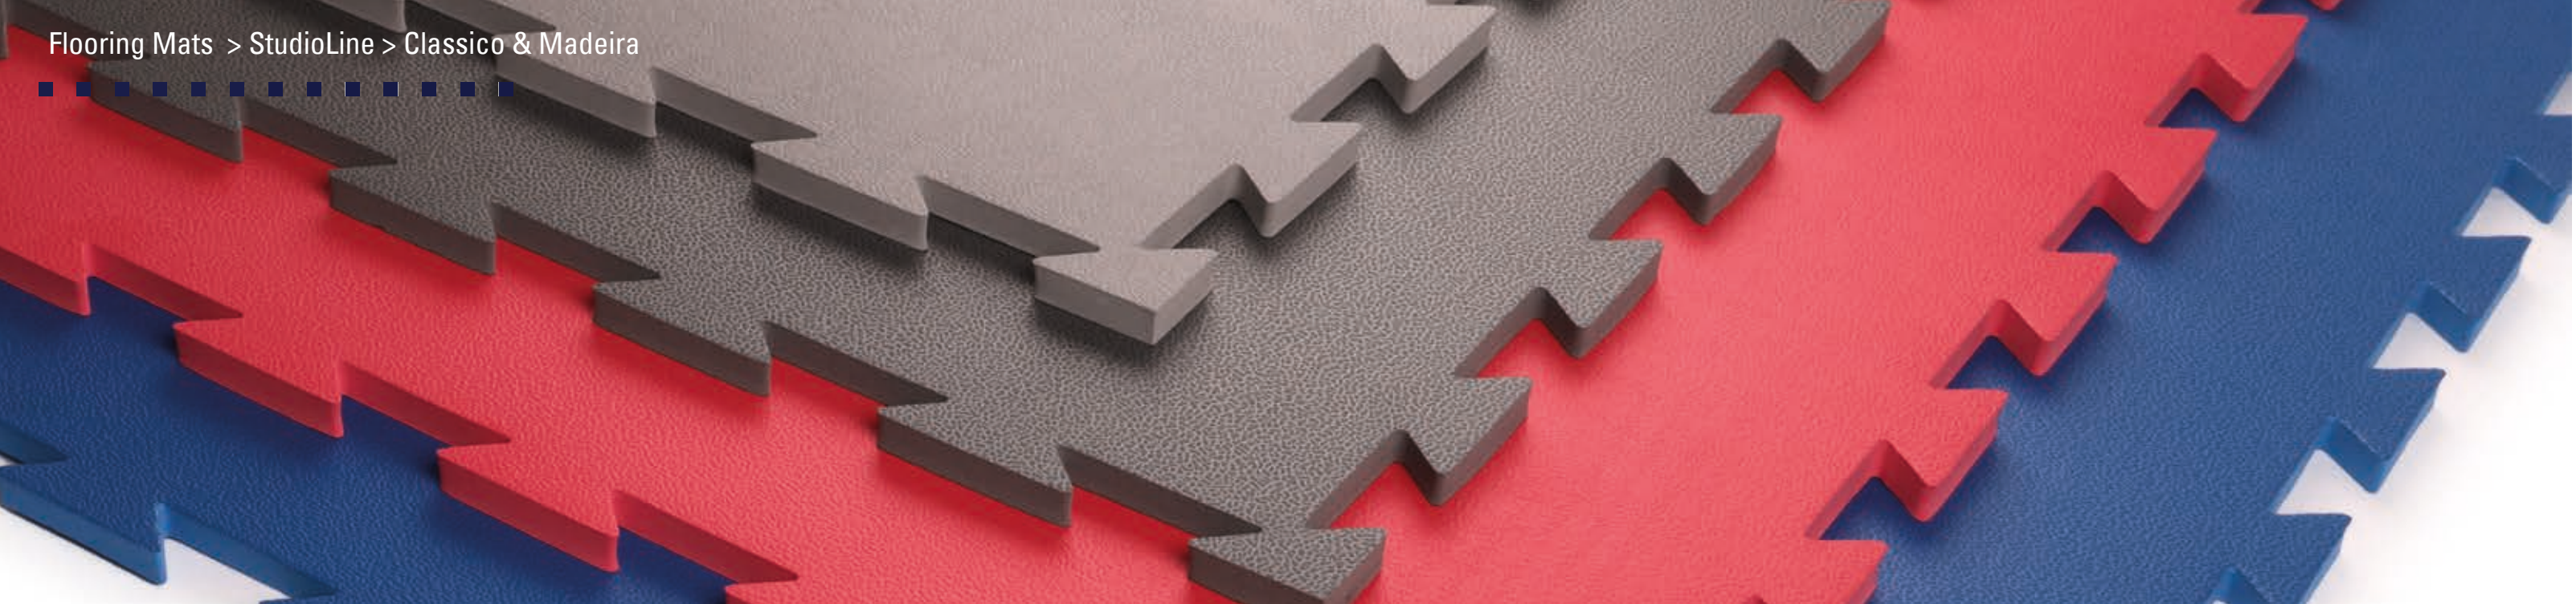

In anthracite or grey

The 50 x 50 cm mats can be easily laid with the help of plastic dowels and form a firm connection with the barbs of the dowels, so that the mats are absolutely non-slip.

The back of the mat has a waffle structure, which provides even better damping properties.

StudioLine Classico

100 x 100 x 1,4 cm (± 0,5 mm)

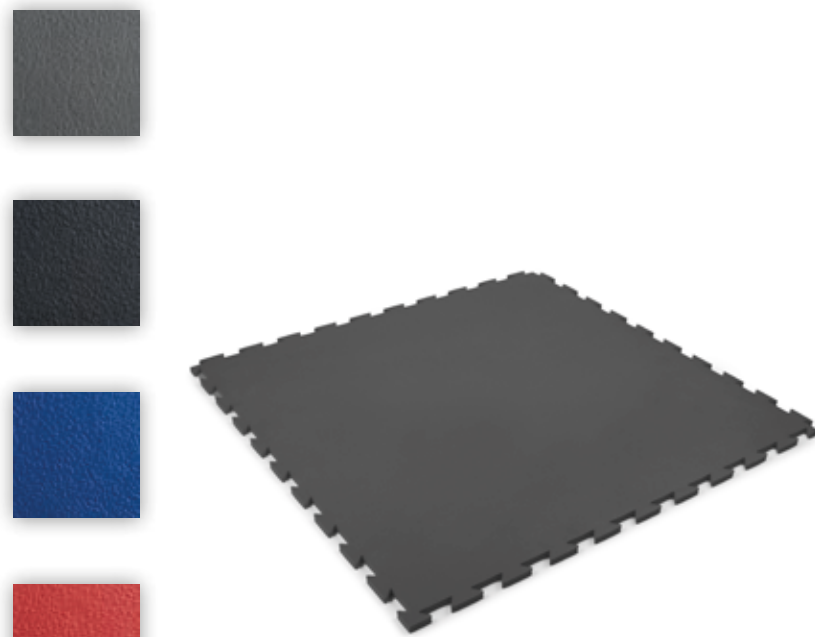

Hardness 60° – 65°

Material: EVA

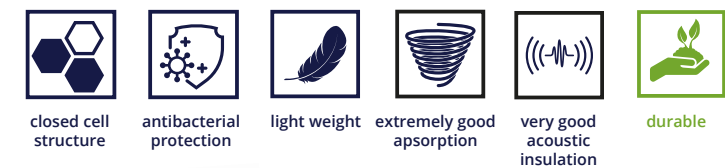

The point-elastic and joint-friendly StudioLine Classico flooring is extremely resistant even under heavy use and is therefore perfectly suitable for fitness studios, therapy rooms and in the aerobic area. The floor covering reduces the development of noise and therefore creates a pleasant acoustic feeling of space.

Laying even without instructions is extremely easy and can be done directly on any substrate without costly preparation. The antibacterial floor is also easy to clean with water. StudioLine Classico offers a color selection between four different colors and thus offers interesting combination options to individually upgrade your fitness area!
